

Application No.: 09/843,145Docket No.: 300014343-1 US (1509-179)**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. **(Previously presented)** A method of advertising comprising:
broadcasting an advertisement via a short range link from an advertiser
telecommunications device;
receiving the broadcast advertisement on a consumer telecommunications device;
replying to the advertisement by sending a reply message from the consumer device to a
broker device;
changing message data of the reply at the broker device; and
communicating the changed reply message from the broker device to the advertiser
device.
2. **(Original)** A method according to claim 1 in which the advertisement is
broadcast to a man portable consumer device.
3. **(Original)** A method according to claim 2 in which the consumer
telecommunications device is a hand-holdable portable and pocketable device.
4. **(Original):** A method according to claim 1 in which the advertisement is
broadcast from a man portable advertiser device.
5. **(Original)** A method according to claim 4 in which the advertiser device is a
hand-holdable portable device.
6. **(Canceled).**

Application No.: 09/843,145**Docket No.: 300014343-1 US (1509-179)**

7. **(Original)** A method according to claim 1 in which the advertiser device does not include its own telecommunications address in its broadcast advertisement.
8. **(Previously presented)** A method according to claim 7 further including the step of including the telecommunications address of the broker device in the advertisement broadcast by the advertiser device.
9. **(Previously presented)** A method according to claim 1 further including the steps of including one or more advertisement classification codes in the advertisement broadcast by the advertiser device, and comparing the one or more advertising classification codes with allowable advertisement codes in an advertisement screening operation by the consumer device.
10. **(Previously presented)** A method according to claim 9 in which the consumer device stores or brings to the attention of a user only those advertisements which are passed by the screening operation that the consumer device performs on the broadcast advertisements that it receives.
11. **(Original)** A method according to claim 1 in which the consumer device replies to an advertisement via long range telecommunications.
12. **(Previously presented)** A method according to claim 1 comprising sending a first part of an advertisement via the short range telecommunications, and a second, longer or larger part of the advertisement via short range telecommunications, the second part of the advertisement being transmitted after the consumer device has screened the first part of the advertisement and communicated with the advertisement broker device.
13. **(Original)** A method according to claim 12 in which the second part of the advertisement is broadcast by the same advertiser device that broadcast the first part.

Application No.: 09/843,145Docket No.: 300014343-1 US (1509-179)

14. **(Previously presented)** A method according to claim 1 comprising using a mobile telephone, personal digital assistant, or other small portable electronic devices for both the advertiser device and the consumer device, the advertiser and consumer devices both having both piconet short range and long range telecommunication capabilities.

15-19. **(Canceled).**

20. **(Original)** A server adapted to act as an advertisement broker device adapted to receive one of (i) an advertisement message or (ii) a reply message to an advertisement and to forward the received message to a remote telecommunications device; the server being adapted to modify the received message so as to ensure, at least initially, that no telecommunications address of an advertiser or replier to an advertisement is passed with the message that is transmitted by the server.

21. **(Original)** A server according to claim 20 which is adapted to store the direct telecommunications address of the provider of the message and to recall that address and forward it to a remote telecommunications device if a release signal has been received by the server.

22. **(Previously presented)** A network comprising an advertiser device comprising a first telecommunications device having both a short range transmitter and receiver, and a long range telecommunications transmitter and receiver, a memory, and a control processor, the memory including an advertisement;

a consumer device comprising a second telecommunications device, having both a short range, piconet, transmitter and receiver, and a long range telecommunications transmitter and receiver, a memory and a control processor, the memory or the processor of the consumer device having an advertisement receiver which, in use, is capable of receiving and storing an advertisement;

and an advertisement broker device contactable via wireless telecommunications with both the advertiser and consumer devices, the broker device being adapted to pass advertiser details to the consumer device, consumer details to the advertiser device, or both, in response to triggering.

Application No.: 09/843,145Docket No.: 300014343-1 US (1509-179)

23-24. (Canceled).

25. (Original) A network according to claim 22 in which the broker device is connectable with the advertiser device and the consumer device via long range wireless telecommunications.

26. (Previously presented) The network of claim 22 wherein each the telecommunications devices includes a hybrid mobile telephone.

27. (Previously presented) A method according to claim 1, wherein the change to the reply message includes augmenting the reply message.

28. (Previously presented) A method according to claim 1, wherein the change to the reply message includes modifying original text or the reply message.

29. (Previously presented) A network according to claim 28, wherein the original text is modified by removing an identifier of the consumer.

30. (Previously presented) A method according to claim 1, wherein the broker device is interposed in a telecommunications link between the advertiser device and the consumer device.

31. (Previously presented) A method according to claim 1, wherein the broker device changes the message sent by the consumer device by augmenting the message sent by the consumer device to enable modification of any follow-up message sent by the advertiser device to the consumer device.

Application No.: 09/843,145**Docket No.: 300014343-1 US (1509-179)**

32. **(Previously presented)** The server of claim 20, wherein in at least one of the advertisement message or the reply message includes a telecommunications address and the server is adapted to remove the telecommunication address from at least one of the advertisement data and the reply message to ensure that no telecommunication address of the advertiser or replier is passed with the message transmitted by the server.

33. **(Previously presented)** The method of claim 1, further including transmitting additional advertisement information from the advertiser device to the consumer device in response to a request for additional information by the consumer device to the advertisement.

34. **(New)** The network of claim 22, wherein the advertisement broker device includes a server adapted to receive one of (i) an advertisement message or (ii) a reply message to an advertisement and to forward the received message to a remote telecommunications device; the server being adapted to modify the received message so as to ensure, at least initially, that no telecommunications address of an advertiser or replier to an advertisement is passed with the message that is transmitted by the server.
